

FOR IMMEDIATE RELEASE

Vienna ranks in top 5% Nursing & Rehab Facilities in California *Vienna's team continues their commitment to the best quality care*

Vienna Nursing and Rehabilitation Center was recently ranked in the top 5% of skilled nursing facilities in California. Using the 2016 Medicare and Medicaid survey results, American Health Care Association (AHCA) combined numbers and ranked skilled nursing facilities throughout the state of California. There are currently 1200 facilities in California and most are large corporations. Despite Vienna's smaller size, the achievements of Lodi's locally owned facility still manages to stand out thanks to the company's strong commitment to quality and excellence.

AHCA divided the scores into three categories: short term care (rehabilitation), long term and dementia care, and organizational success. Vienna's short term care stood out with some of the state's lowest hospital readmission rates, safe and successful discharge back into the community for rehab patients, and improved functional mobility for patients. Vienna's long term and dementia care was acknowledged for taking a strong and successful stand in reducing the use of antipsychotic medications, and reducing the hospital admissions for residents. Lastly, Vienna proudly excelled in high levels customer satisfaction and staff stability.

Additional achievements that improved Vienna's ratings include the facilities 2016 "Golden Survey" (5-star ranking with zero deficiencies), their 2016 Bronze Quality Award for commitment to quality, the Music & MemorySM program, and facility management. Corey Wright, Administrator and Vienna staff member of 30 years, is thankful for his team and their hard work. "Vienna is proud of our dedicated team that helps create such a special place for people to live, rehabilitate and enjoy quality of life. We will continue to strive to improve upon this great foundation and commit to quality of care."
